Title: File Handling in Python

Program:

File handling example

Writing to file

```
file = open("sample.txt", "w")
```

```
file.write("Hello, this is a file handling example.\n")
```

```
file.write("Python makes file handling easy.\n")
```

```
file.write("Also, Shreyas is a nice guy!.\n")
```

```
file.close()
```

Reading file

```
file = open("sample.txt", "r")
```

```
print("\nFile Content:")
```

```
print(file.read())
```

```
file.close()
```

Appending to file

```
file = open("sample.txt", "a")
```

```
file.write("This line is added later by Shreyas!.\n")
```

```
file.close()
```

```
# Reading line by line

file = open("sample.txt", "r")

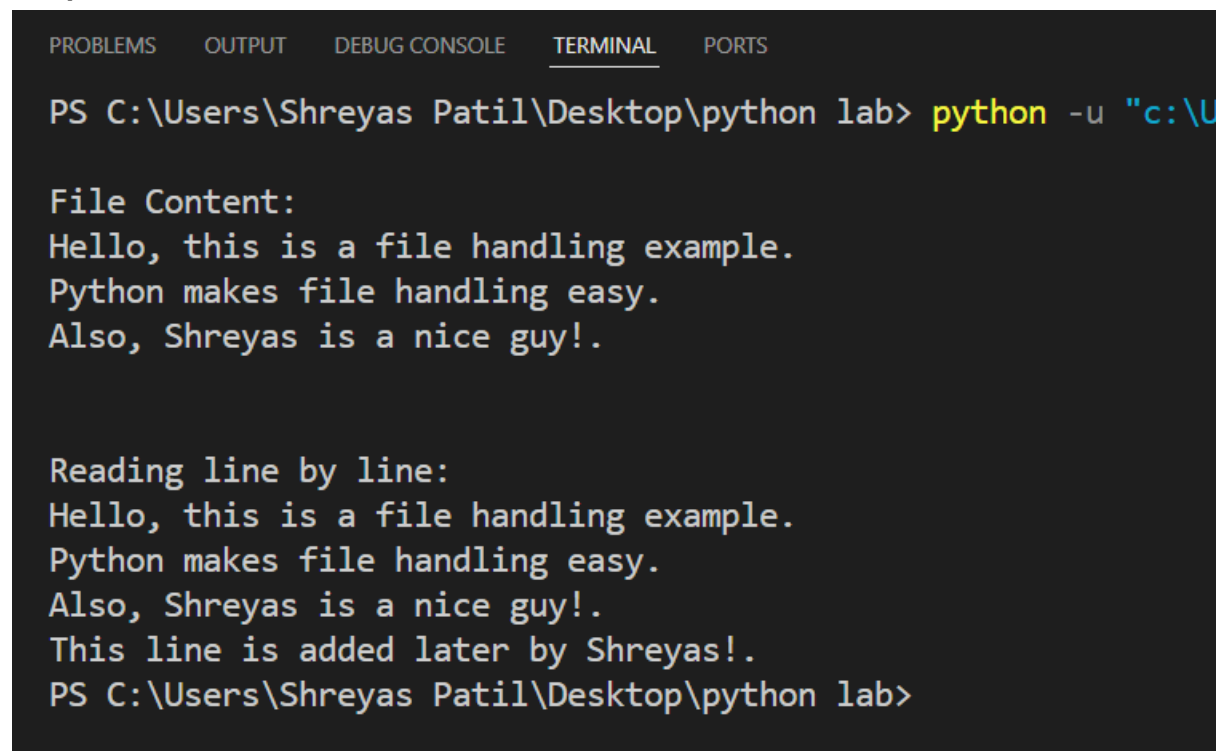

print("\nReading line by line:")

for line in file:

    print(line.strip())

file.close()
```

Output:

The screenshot shows a VS Code terminal window with the 'TERMINAL' tab selected. The terminal displays the output of a Python script executed from the command prompt. The output is as follows:

```
PS C:\Users\Shreyas Patil\Desktop\python lab> python -u "c:\U

File Content:
Hello, this is a file handling example.
Python makes file handling easy.
Also, Shreyas is a nice guy!.

Reading line by line:
Hello, this is a file handling example.
Python makes file handling easy.
Also, Shreyas is a nice guy!.
This line is added later by Shreyas!.
PS C:\Users\Shreyas Patil\Desktop\python lab>
